DETAILED ACTION

1. The Office Action is responsive to the communication filed on 02/07/2011.
2. Claims 1-3 and 5-39 are allowed.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: The prior art, alone or in combination, does not teach the following limitations:

4. A method of presenting content data, comprising:
receiving at a server device a present request indicating locked content data from a client connected to a hub network,
wherein the server device is configured to set up the hub network including adding the client and the server device to the hub network,,
wherein the server device is configured to function as a client in the hub network,
and
wherein said locked content data is stored on the server device connected to the hub network;
checking a license corresponding to said locked content data to determine if said license permits said client to present said locked content data,
wherein said locked content data is a bound instance if said license permits presentation of said locked content data by said client connected to the hub network,
wherein the bound instance of said locked content data and the license corresponding to said locked .content data .are bound to the hub network, and
wherein said locked content data is changed to a discrete instance when said locked content data is to be moved to another server device bound to another hub network, the server device sends a disable request for the locked content data to clients of the hub network to indicate that the bound instance of the locked content data is changed to the discrete instance, and wherein the disable request causes the license corresponding to the locked content data to be disabled; and
presenting said locked content data through a presentation component connected to said client when said locked content data is a bound instance.

5. The most pertinent prior art that pertains to the above limitation includes Tierney et al. (20030236820), Chase JR et al. (20030187801), Foster et al. (20030198351), Peinado (7073063), Messerges et al. (20040088541), Higashi et al. (20020107806), and Gross et al. (6802003). In addition, the following office actions and associated references were reviewed for limitations the expressly or impliedly read on the above limitations. Please see actions 10686955 | 10403993 | 10686954 | 10680713. In particular, the prior art, alone or in combination, does not teach the specific limitations of: wherein said locked content data is changed to a discrete instance when said locked content data is to be moved to another server device bound to another hub network, the server device sends a disable request for the locked content data to clients of the hub network to indicate that the bound instance of the locked content data is changed to the discrete instance, and wherein the disable request causes the license corresponding to the locked content data to be disabled

In particular, the prior art, alone or in combination, does not teach that the disable request is a request to change the bound instance of the locked content data to the discrete instance. The disable request is initiated when the locked content data is to be moved to another server device bound to another hub network. This combination is not taught by the combination of the above prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
